Towards a General Theory of Everything

Alice Anderson[†] Bob Bull[‡] Sam Student[§¶] Yiftach Yahoo[‖]

Abstract

In this paper we show that all previous results in computer science are a simple generalization of the equality

$$\sum_{i=1}^{\infty} \frac{1}{2^i} = 1.$$

Presented at the 5th International Symposium on the Theory of Nothingness, Moscow, Russia, July 34–37, 1835.
