LIST OF PUBLICATIONS

BOOKS

1. G.A. Freiman
   Foundations of a Structural Theory of Set Addition.

2. G.A. Freiman
   Foundations of a Structural Theory of Set Addition.

3. G.A. Freiman (Editor)
   Number-Theoretic Studies in Markov Spectrum and in the Structural Theory of Set Addition.

4. G.A. Freiman
   Diophantine Approximations and the Geometry of Numbers (Markov’s Problem).

ARTICLES

1. G.A. Freiman
   On one variant of Waring’s problem.
   Vestnik Mos. Univ. 3, (Russian) 3-12 (1949).

2. G.A. Freiman
   On the exponential density of sequences.

3. G.A. Freiman
   An elementary method of solution of problems on the partition of numbers into an unbounded number of summands.

4. G.A. Freiman
   Inverse problems of additive number theory.
5. G.A. Freiman
Inverse problems of additive theory of numbers.

6. G.A. Freiman
An elementary method of proof of limit theorems of the theory of probability.
Vestnik Leningrad Univ. 11, 1, (Russian) 57-73 (1956).

7. G.A. Freiman
On the theorems of Poincare and Perron.
Uspehi Mat. Nauk (N.S.) 12, 3(75), (Russian) 241-246 (1957).

8. G.A. Freiman
Waring’s problem with an increasing number of terms.

9. G.A. Freiman
Dense sequences in the theory of partitions.

10. A.A. Drosdova, G.A. Freiman
The estimation of certain arithmetic functions.

11. G.A. Freiman
The addition of finite sets. I

12. G.A. Freiman
Inverse problems in additive number theory. On the addition of sets of residues with respect to prime modulus.

13. G.A. Freiman
Inverse problems in additive number theory VI. On the addition of finite sets III.

14. G.A. Freiman
Inverse problems of additive number theory VII. Additions of finite sets IV. The method of trigonometric sums.

15. G.A. Freiman
On the addition of finite sets.

16. G.A. Freiman
Inverse problems of additive number theory VIII. On a conjecture of P. Erdos.
17. G.A. Freiman
Inverse problems of additive number theory IX. The addition of finite sets V.

18. G.A. Freiman
Inverse problems of additive number theory.

19. G.A. Freiman, A.A. Judin
On the Markov spectrum.

20. G.A. Freiman
Non-coincidence of the spectre of Markov and of Lagrange.

21. G.A. Freiman, G.V. Pavlova
The part of the Markov spectrum of measure zero. Number-theoretic studies in the
Markov spectrum and in the structural theory of set addition.

22. G.A. Freiman
The initial point of Hall’s ray.

23. G.A. Freiman, A.A. Judin
The general regularities of additive number theory.

24. G.A. Freiman, A.A. Judin, D.A. Moskvin
Inverse problems of additive number theory and local limit theorems for lattice random
variables.

25. G.A. Freiman, V.P. Pigarev
The relation between the invariants $R$ and $T$.

26. G.A. Freiman
Groups and the inverse problems of additive number theory.

27. G.A. Freiman, A.A. Judin, D.A. Moskvin
Structural theory of set addition and local limit theorems for independent lattice random
variables.
28. A.S. Fomin, G.A. Freiman
   Local limit theorem for series equally distributed lattice random variables.

29. A.A. Berstein, G.A. Freiman
   Analytical methods of discrete optimization.
   Zely i Resoursy w dologsrocnom planirovaniy, Moskva, ZEMJ, (Russian) 89-105 (1979).

   Analytical methods in integer programming.

   Analytical methods in combinatorial problems.

32. G.A. Freiman
   An analytical method of analysis of linear Boolean equations.

33. P.L. Buzytsky, G.A. Freiman
   On a possibilities of solving combinatorial problems by analytical methods.

34. G.A. Freiman
   On two and three element subsets of groups.

35. L.V. Brailovsky, G.A. Freiman
   On two-element subsets in groups.

   Integer programming and number theory.

37. P. Buzytsky, G.A. Freiman
   An effective formula for the number of solutions of system of two 0.1-equations.

38. L.V. Brailovsky, G.A. Freiman
   Groups with small cardinality of the cubes of their two element subsets.

   An effective formula for the number of solutions of a system of 0.1-linear equations.
40. G.A. Freiman  
Nonclosed semigroups with cancellation.  

41. G.A. Freiman  
On the measure of large trigonometric sums.  

42. G.A. Freiman  
What is the structure of $K$ if $K + K$ is small?  

43. G.A. Freiman, A. Heppes, B. Uhrin  
A lower estimation for the cardinality of finite difference sets in $\mathbb{R}^n$.  

44. G.A. Freiman, H. Halberstam  
On a product of sines.  

45. G.A. Freiman, L. Levitin, E. Lipkin  
A polynomial algorithm for constructing families of $k$-independent sets.  

46. G.A. Freiman, B.M. Schein  
Group and semigroup theoretic considerations inspired by inverse problems of additive number theory.  
Lecture Notes in Mathematics 1320, 121-140 (1988).

47. N. Alon, G.A. Freiman  
On sums of subsets of a set of integers.  

48. G.A. Freiman  
On extremal additive problems of Paul Erdos.  
Ars Combinatoria 26B, 93-114 (1988).

49. M. Chaimovich, G. Freiman, Z. Galil  
Solving dense subset-sum problems by using analytical number theory.  

50. G.A. Freiman, P. Erdos  
On two additive problems.  

51. L.V. Brailovsky, G.A. Freiman  
On a product of finite subsets in a torsion-free group.  
52. G.A. Freiman  
Subset-sum problem with different summands.  

53. L. Brailovsky, G. Freiman, M. Herzog  
Special elements in groups.  
Proceedings of the Second International Group Theory Conference, Supplemento ai  
Rendiconti del Circolo Matematico di Palermo, Bressanone-Brexen, June 11-17, 1989,  
Ser II, no. 23, 33-42 (1900).

54. G.A. Freiman  
Transfer-matrix of small order.  

55. G.A. Freiman, B.M. Schein  
Interconnections between the structure theory of set addition and rewritability in  
groups.  

Small squaring and cubing properties for finite groups.  

57. G.A. Freiman  
Sumsets and powers of 2.  
Colloquia Mathematica Societatis János Bolyai, 60, Budapest (Hungary), 279-286  

58. G.A. Freiman, H. Halberstam, I. Ruzsa  
Integer sum sets containing long arithmetic progressions.  

59. G.A. Freiman, B.M. Schein  
Structure of $R(3,3)$-groups.  

60. G.A. Freiman  
On the structure and the number of sum-free sets.  

61. G.A. Freiman  
New analytical results in subset sum problem.  

62. G. Freiman, J. Pitman  
Partitions into distinct large parts.  
63. J-M. Deshouillers, G.A. Freiman
On an additive problem of Erdös and Straus, 1.

64. G. Freiman
On solvability of a system of two boolean linear equations.

65. G.A. Freiman
Asymptotic formula for a partition function \( q(n) \).

66. G. Freiman
Structure theory of set addition.

On an additive problem of Erdös and Straus, 2.

On the structure of sum-free sets, 2.

69. G. Freiman, L. Low, Jane Pitman
Sumsets with distinct summands and the conjecture of Erdös-Heilbronn on sums of residues.

70. J-M. Deshouillers, G. Freiman, W. Moran
On series of discrete random variables, 1. Real trinomial distributions with fixed probabilities.

71. J.-M. Deshouillers, G.A. Freiman, A.A. Yudin
On bounds for the concentration function, 1.

72. G. Freiman, S. Litsyn
Asymptotically exact bounds on the size of high-order spectral-null codes.

73. A.M. Vershik, G.A. Freiman, Yu.V. Yakubovich
Local limit theorem for random partitions of positive integers.

74. G. Freiman, A. Geroldinger
An addition theorem and its arithmetical application.
75. Jean-Marc Deshouillers, Gregory A. Freiman, Alexander A. Yudin
   On bounds for the concentration function II.

76. G.A. Freiman
   Structure theory of set addition. II. Results and problems.
   1-18. Bolyai Society Mathematical Studies X.

77. G. Freiman, B. Granovsky
   Asymptotic formula for a partition function of reversible coagulation-fragmentation
   processes.

78. J-M. Deshouillers, G. Freiman
   A step beyond Kneser’s theorem for abelian finite groups.

79. Jean-Marc Deshouillers, Gregory A. Freiman, Alexander A. Yudin
   An application of structure theory of set addition to a question in Ergodic theory.
   DIMACS Series in Discrete Mathematics and Theoretical Computer Science, 64, 53–60
   (2004).

80. Gregory A. Freiman, Simon Litsyn, Alexander Yudin
   A method to suppress high peaks in BPSK-modulated OFDM signal.

81. Jean-Marc Deshouillers, Gregory A. Freiman
   When subset-sums do not cover all the residues modulo p.

82. Gregory A. Freiman, Boris L. Granovsky
   Clustering in coagulation-fragmentation processes, random combinatorial structures
   and additive number systems: asymptotic formulae and zero-one law.

83. Gregory A. Freiman, Alexander A. Yudin
   The interface between probability theory and additive number theory (Local Limit
   Theorems and Structure Theory of Set Addition).

84. Jean-Marc Deshouillers, Gregory A. Freiman
   On sum-free sets modulo p.

85. Gregory A. Freiman, Yonutz V. Stanchescu
   On a Kakeya-type problem.
   Functiones et Approximatio XXXVII.1, 131–148 (2007).
86. Gregory A. Freiman
   On the detailed structure of sets with small additive property.
   Combinatorial Number Theory and Additive Group Theory,

87. Gregory A. Freiman
   Inverse Additive Number Theory XI.
   Long arithmetic progressions in sets with small sumsets.

88. Gregory A. Freiman, Yonutz V. Stanchescu
   On a Kakeya-type problem II.

89. Gregory A. Freiman, Yonutz V. Stanchescu
   Sets with several centers of symmetry.

90. Gregory A. Freiman

91. Gregory A. Freiman, D. Grynkiewicz, O. Serra, Y. V. Stanchescu

92. Gregory A. Freiman, D. Grynkiewicz, O. Serra, Y. V. Stanchescu

93. Gregory A. Freiman, M. Herzog, P. Longobardi, M. Maj
   Small doubling in ordered groups, 1-12, submitted.

94. Gregory A. Freiman, A.A. Yudin
   About the Measure of Large Values of the Modulus of a Trigonometric Sum, submitted.

95. Gregory A. Freiman
   Structure Theory of Set Addition III. Results and Problems, arXiv:1204.5288

96. G. A. Freiman, M. Herzog, P. Longobardi, M. Maj, Y. V. Stanchescu
