Advanced topics in data structures:

bibliography list #2

1. Various kinds of biased search trees are described in [1].
2. Splay trees were introduces in [7]. Material on compression via splay trees can be found in [6] and [5]. The recent proof of the dynamic finger conjecture is in [3, 2].
3. Dynamic trees are also described in [7].
4. The Material on the order maintainance problem is from [4].
