Advanced topics in data structures
bibliography 1

November 3, 1999

[9] is a general survey on amortized analysis. Stuff on red-black trees can be found in [8]. Finger search trees and the algorithm for sorting jordan sequences are described in [10, 3]. The material on persistent data structures is from [2, 7, 5, 6, 4]. The algorithm for maintaining order in a list is from [1].
